excerpt from experimental chemistry the purpose of this book is to promote the more efficient teaching of chemistry by modern methods the choice and arrangement of subject matter is based on the author s extended experience with students of varied ability the book as a whole is the outcome of a desire to provide a course in chemistry which shall be a judicious combination of the inductive and deductive methods the concise directions and specific questions in the experiments aim to obviate the difficulties and perplexities which hinder the progress of beginners in chemistry the experiments are representative no important ones have been omitted and no senseless or dangerous ones have been included every experiment need not be done by each pupil indeed many experiments may be advantageously performed by the teacher either on the lecture table or in the laboratory others may be done by the more skilful students and the results utilized in the class room abundant material has been purposely provided to meet varied conditions the teacher s supplement suggests different uses of many experiments and the author invites correspondence regarding the adaptation of the book to special demands two supplementary sets of questions arise from most completed experiments one class may and often must be answered in the laboratory where necessary data are available the laboratory exercises aim to meet this demand about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

this laboratory manual provides an extensive laboratory program compatible with the text the 61 experiments present a wide variety of chemistry and many experiments offer choices of procedures safety is strongly emphasized throughout the program

excerpt from experimental chemistry for high school students this course of experiments has been arranged for students in high schools and is intended to lead directly to the courses in the state university since many of the principles of chemistry are founded upon quantitative relations a number of such experiments has been introduced but no exercise has been incorporated into the course that has not been successfully performed special care has been taken in clearly describing the experiments so that pupils may not fail to obtain good results considerable attention has also been given by questions and suggestions to cause the student to think carefully over observed phenomena the use of symbols has been avoided in the earlier stages of the work and qualitative analysis has been entirely omitted very little of real value can be accomplished in the way of qualitative analysis in so short a time a number of the most important elements and their compounds has been considered and the experiments outlined are only those which may be performed by the student during the year the course may be modified whenever desirable by supplementary directions prepared by the instructor the writer is of the opinion that a few elements and their most important compounds studied carefully are of much more value than a great many studied hurriedly about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
